6. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-40 is the inclusion of the limitation of the phase correction device is adapted to phase match the first summed component signal with the second summed component signal. It is this limitation found

in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claim 41 is the inclusion of the limitation of the antenna unit and the means for compensating are mounted to a gimbal assembly that is adapted to move the combination over a range in elevation and azimuth. It is this limitation found in the claim, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.
